As a first step check the size of the printed paper. This guide is in A4 size, so **please measure the print size validator on the right side with a ruler after printinging**. If it fits, then you can measure your ring size in an easy way.
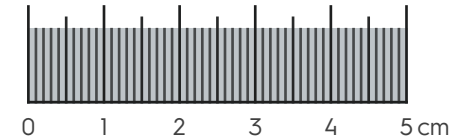

Please note that the following sizes only apply to the ring sizes available at the webshop of Glatt Jewelry. Other brands or jewelers may define their ring sizes differently.

Measure Your Own Ring

Place your own ring on the circles below, and use them to determine its size. It's important to **measure the inside diameter of your ring** to the circles. If you buy a much wider ring from the webshop than the jewelry you use for the measurement, then round up instead; while if you buy a thinner piece, round down.
